1 Overview

MuscleMap is a comprehensive fitness platform with 34 pages/features. This document describes the key features and capabilities.

2 Core Features

2.1 Real-Time Muscle Visualization

- 3D muscle model using Three.js
- Color-coded muscle activation display
- Interactive body part selection
- Anatomically accurate muscle groups

2.2 Workout Tracking

- Log exercises with sets, reps, weight
- Timer for rest periods
- Progress tracking over time
- Exercise history and statistics

2.3 Exercise Library

- 500+ exercises with detailed instructions
- Muscle group targeting information
- Equipment requirements
- Difficulty ratings

3 Community Features

3.1 Social Integration

- Leaderboards and competitions
- High-five system for encouragement
- Direct messaging between users
- Activity feed and social sharing

3.2 Location Services

- Gym finder with map integration
- Check-in system
- Nearby workout partners

4 Gamification

- XP and leveling system
- Achievements and badges
- Character stats (RPG-style)
- Skins and avatar customization
- Virtual currency (credits)

5 Technical Features

5.1 Icon System

The application uses a unified icon system combining:

- Lucide React (1,000+ general UI icons)
- Phosphor Icons (7,000+ fitness-focused icons)
- DiceBear (programmatically generated avatars)
- Custom fitness icons (muscle groups, equipment)

5.2 Design System

- Liquid Glass aesthetic
- Dark mode optimized
- Brand colors: Electric Blue (#0066FF), Pulse Magenta (#FF3366)
- Responsive design for all devices

6 Mobile App

The React Native mobile app provides:

- Native iOS and Android experience
- HealthKit/Google Fit integration
- Push notifications
- Offline workout logging
- Biometric authentication
